FortiClient VPN

FortiClient is an application which allows remote staff to connect and access internal documents and resources.

- Connection Information
- Starting the VPN

Connection Information

By default, all laptops should arrive pre-configured with all VPN settings applied, however if this is not the case, use the following instructions to setup the VPN.

1. Open the **FortiClient.**

2. Select **Add a New Connection**.

3. Fill in the following fields. All other fields can remain with their default settings.

Name	George and Bell
Address	remote.georgeandbell.com
Port	443

4. Select **Save**.

Starting the VPN

The following instructions will walk you through connecting to George & Bell's network using the FortiClient VPN application.

Instructions

Within the Taskbar double-click the **FortiClient** shield icon forticlient_p2.png Alternatively, you can open the FortiClient via the Start Menu. Enter your domain username and password and press **Connect.**
