

# Accessing Your Account

To login to LiquidFiles, please browse to <https://transfer.georgeandbell.com>, signing in with your email address and domain password (same password as your laptop login).

If logging in from a work laptop, press SSO Login, to sign-in automatically.

The screenshot shows the LiquidFiles login interface. At the top center is the LiquidFiles logo, which consists of a blue circular swirl with a yellow triangle in the center. Below the logo, the text 'LiquidFiles' is displayed in a blue and orange font, with the tagline 'YOUR FILES IN YOUR CONTROL' underneath. The login form below contains two input fields: 'Email' and 'Password'. To the right of the 'Password' field is a blue 'Login' button. Below these fields is a checkbox labeled 'Remember me for two weeks'. At the bottom of the form are two buttons: 'Password Reset' and 'SSO Login'.

You will be prompted to complete a Duo authentication request. Press **Send Me a Push** to initiate the authentication request. When it appears, approve the request.
